

The **AutoBilling®** module is fully integrated with the general laboratory management system - **AutoLims®** and enables the laboratory professional to administer the entire billing and payment aspects of their activities. **AutoBilling®** offers a flexible price schedule definition and enables enhanced focus on customer needs.

FEATURES

- Continuous synchronization with **AutoLims®** including post-completion changes.
- Test to Service mapping allows for accurate billing, while keeping lab test catalog clean.
- Itemized billing at the service level.
- Automated travel calculation algorithms.
- Automatic “Medicare Part-A” invoicing.
- Customizable invoices (format, aging balance, etc).
- Complete support for clearing houses and collection agencies.
- Individual service code per payer simplifies internal representation while complying with payer requirements.
- Automatic carrier-based ‘exception’ definitions.
- Electronic billing and remittance with pre-programmed response to denial codes.
- Flexible pricelists with options for relative definitions including ‘carve-outs’ for specific services.
- Service level billing and remittance handling.

BENEFITS

- Enhanced revenue capture and growth.
- Accurate billing - avoid denials and rejections.
- Reduce the number of days of outstanding receivables through quicker start and more accurate capture and handling of exceptions.
- Accurate billing coupled with clean test and services catalog.
- Automation of processes allows personnel to focus on maximizing revenue through better coverage of claims.
- Minimized need for manual interventions.
